EDUCATION

Concordia University - Montreal **Expected 2028**
Bachelor of *Computer Science (BCompSc)* *GPA: 3.72*
Member, Institute for Co-Operative Education

Cégep Édouard-Montpetit **2022 - 2024**
Diploma of College Studies (DEC), Human Sciences

PROJECTS

Melville Clothing | Live Game **2026**
Roblox Studio, Luau, Blender

- Built a 3D clothing store in Roblox Studio with Luau systems for avatar try-on, fitting rooms and checkout.
- Reached **2k+ visits** and **1.2k+ in-game item sales** after launching the experience to real players.
- Added an asset loader so a growing clothing catalog loaded faster and without blurry textures.
- Promoted the launch on TikTok with short videos showcasing the store.

SkinAI | AI-Powered Skincare App **2026 - Present**
Swift, SwiftUI, Node.js, PostgreSQL (Supabase), Gemini API | In development

- Building an iOS app in Swift and SwiftUI that keeps a user's skincare products, routines and reminders in one place.
- Integrated the Gemini API through a Node.js backend to explain ingredients, keeping the API key server-side with rate limiting and caching.
- Built a personal product inventory backed by a custom product database that cleans and deduplicates imported product data.
- Used Apple Vision to scan barcodes, packaging and ingredient labels on-device.
- Designed a PostgreSQL schema for products, ingredients, routines, skin logs and reactions, served to the iOS app through a Node.js API.

Smart Travel Planner | Course Project 2026
Java, JFreeChart, HTML/CSS, CSV | Team project

- Built a Java app with a teammate to manage travelers, trips, transport and lodging, using inheritance and polymorphism for per-option pricing.
- Added CSV save/load that relinks records, input validation with an error log, and a generated JFreeChart dashboard comparing trip costs and destinations.

EXPERIENCE

Brandy Melville **2024 - Present**
Sales Associate *Montreal, QC*

- Assist 100+ customers per shift with product selection and questions in a high-volume downtown store, helping shoppers navigate the sales floor.
- Process purchases and exchanges through POS systems, explaining available options clearly when issues arise.
- Restock merchandise and maintain displays with teammates to keep the sales floor organized during peak traffic.

Maison de Jonathan **2024**
Tutor *Greater Montreal Area, QC*

- Tutored 10 students in Grades 7–11 in math, science and history, breaking down difficult concepts into manageable steps.
- Taught study strategies and guided students through problems to build confidence and independent learning.
- Summarized each student's progress and remaining difficulties in meetings with supervisors.

SKILLS

Programming: Java, Swift, SQL, Luau, HTML/CSS, Python & C (basic)
Technologies: Git/GitHub, Xcode, SwiftUI, Node.js, PostgreSQL/Supabase, Roblox Studio, Blender, Microsoft Office
Concepts: Object-oriented programming, REST APIs, LLM integration, computer vision (Apple Vision), probability and statistics
Languages: English, French (fluent); Spanish
